

QUANTAR MAGIC!

An alternative, digital currency,
designed to transform our world!

‘Gold is the money for kings, silver the money for merchants,
barter the money for peasants, and debt, the money for slaves!’

The Quantar concept, introduces a sophisticated form of barter, designed to monetise the commons, the beating heart of our nations. Quantar differs from digital currencies, such as Bitcoin, as Quantar offers no capital gains, no investment profits, no exchange with national currencies, and Quantar imposes, no internal fees, upon Quantar transactions. To quote the philosopher, Aristotle, ‘Money was intended to be used in exchange but not to increase at interest’.

How then does Quantar operate? Firstly, Quantar uses Cyclos banking software, to create a digital marketplace, where people offer goods and services. Quantars can also be exchanged directly, between family members, friends, social groups, and our trading contacts, within our neighbourhoods, or nation-wide.

Quantar is open to everyone, at least eight years in age, who also possess an Australian bank account, and each initial, \$18 annual membership, plus every renewal, includes 500 complimentary Quantars, as seed capital, for transactions. Every Quantar is valued, at one Australian dollar, so the financial power, within the subscriptions, increases, **by 2777%!**

These are the Quantar basics. However, Quantar is also a complex, multidimensional, financial concept, to be revealed, as Quantar expands, and we expect Quantar will eventually interface, with other marketplaces, such as eBay, and Amazon.

Further, Quantar is the only, alternative digital currency,
backed by a \$AUD10,000 Universe Challenge!
